- **Tools:** VS Code, Git, Linux
- **Frontend:** HTML, CSS, React, Vite
- **Design:** AutoCAD, Adobe Illustrator, Photoshop
- **Languages:** Arabic (native), English (fluent)

Education

University Of Waterloo – BAsC in **Computer Engineering (Co-Op)**

Relevant courses: Digital Logic, Data Structures, Circuits, Embedded Systems

Expected graduation: **August 2030**

Waterloo, ON

Projects

AthanPi – Raspberry Pi Athan Player [GitHub](#)

- Built a Linux-based Python system on Raspberry Pi to play Athan audio and scheduled notifications using Python scheduling libraries and systemd.
- Implemented scheduled task execution and system-level automation.

Smart-Water – Automated Plant Irrigation System [GitHub](#)

- Designed and implemented an STM32-based irrigation controller integrating soil moisture sensors and relay-controlled pumps.
- Created schematics and defined system requirements for sensor-driven control logic.

Experience

UW Formula Electric – Suspension Sub-team member

Sep. 2025 – Present

Waterloo, ON

- Designed and fabricated mechanical parts according to team drawings and tolerances
- Gained hands-on experience with machine shop tools and manufacturing processes
- Gained exposure to design processes and engineering workflows within a multidisciplinary team

Save-On-Foods – Grocery Clerk / Dairy Clerk

Jun. 2023 – Aug. 2024
